Pack-up Instructions for the Q10

This procedure will outline the steps needed to pack-up a Q10 for shipment.

NOTE: If this instrument is equipped with an RCS or LNCS, the flange temperature **must** be at ambient temp **before** removing the cooling head.

1. Remove the 4 screws that hold on the blue cell dress cover and remove the cover.
2. Unplug the 2-pin heater power wire (RCS ONLY).
3. Remove the cooling unit (RCS, LNCS, FACS) from the cell (Figure 1).
4. Place the shipping foam over the cell as shown in figure 2. Tighten the shipping clamp.
5. Re-install the blue dress cover over the cell (Figure 3).
6. Carefully remove the instrument feet.
7. Place the instrument carefully on the pallet and install the 4 shipping bolts.
8. The instrument is now ready to ship.
