

## 2019 TRAINING COURSES AND CONFERENCES

SWEDEN, DENMARK, FINLAND, AND NORWAY

|                                                                          | COURSE NAME                                                                                 | DATE, LOCATION                                                                                                               |
|--------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| THERMAL ANALYSIS                                                         | Differential Scanning Calorimetry (DSC) Training Course (Theory and Application)            | 27 <sup>th</sup> March, Lund                                                                                                 |
|                                                                          |                                                                                             | 24 <sup>th</sup> September, Stockholm                                                                                        |
|                                                                          | Modulated Differential Scanning Calorimetry (MDSC) Training Course (Theory and Application) | 28 <sup>th</sup> March, Lund (½ day, morning)                                                                                |
|                                                                          |                                                                                             | 25 <sup>th</sup> September, Stockholm (½ day, morning)                                                                       |
|                                                                          | Thermogravimetric Analysis (TGA) Training Course (Theory and Application)                   | 28 <sup>th</sup> March, Lund (½ day, afternoon)                                                                              |
|                                                                          | TGA and Simultaneous DSC and TGA (SDT) Training Course (Theory and Application)             | 26 <sup>th</sup> September, Stockholm (full day)                                                                             |
|                                                                          | Dynamic Mechanical Analysis (DMA) Training Course (Theory and Application)                  | 28 <sup>th</sup> to 29 <sup>th</sup> August, Copenhagen (1½ day)                                                             |
| Thermomechanical Analysis (TMA) Training Course (Theory and Application) | 29 <sup>th</sup> August, Copenhagen (½ day, afternoon)                                      |                                                                                                                              |
|                                                                          | Thermal Technology Tour (visiting thermal users)                                            | 27 <sup>th</sup> February, CPH/Malmö/Lund                                                                                    |
|                                                                          |                                                                                             | 22 <sup>nd</sup> October, Helsinki                                                                                           |
| RHEOLOGY                                                                 | Basic Rheology Training Course (Theory and Practical)                                       | 13 <sup>th</sup> to 14 <sup>th</sup> March, Copenhagen/Malmö                                                                 |
|                                                                          |                                                                                             | 11 <sup>th</sup> to 12 <sup>th</sup> September, Stockholm                                                                    |
|                                                                          | Rheology Technology Tour (visiting rheometer users)                                         | 12 <sup>th</sup> to 13 <sup>th</sup> June, Copenhagen/Malmö<br>6 <sup>th</sup> to 7 <sup>th</sup> November, Helsinki/Tampere |
| MICROCALORIMETRY                                                         | Microcalorimetry – TAM Air Training Course (Theory and Practical)                           | 23 <sup>rd</sup> April, Stockholm                                                                                            |
|                                                                          |                                                                                             | 7 <sup>th</sup> October, Stockholm                                                                                           |
|                                                                          | Microcalorimetry – TAM III & IV Training Course (Theory and Practical)                      | 24 <sup>th</sup> April, Stockholm                                                                                            |
|                                                                          |                                                                                             | 8 <sup>th</sup> October, Stockholm                                                                                           |
|                                                                          | Microcalorimetry – Affinity ITC & Nano ITC Training Course (Theory and Practical)           | 25 <sup>th</sup> April, Stockholm                                                                                            |
|                                                                          |                                                                                             | 9 <sup>th</sup> October, Stockholm                                                                                           |
| Microcalorimetry – Nano DSC Training Course (Theory and Practical)       | 26 <sup>th</sup> April, Stockholm                                                           |                                                                                                                              |
|                                                                          | 10 <sup>th</sup> October, Stockholm                                                         |                                                                                                                              |
| OTHER                                                                    | 56 <sup>th</sup> Nordic Polymer Days                                                        | 5 <sup>th</sup> to 7 <sup>th</sup> June, Trondheim                                                                           |
|                                                                          | 28 <sup>th</sup> Nordic Rheology Conference                                                 | 21 <sup>st</sup> to 23 <sup>rd</sup> August, Gothenburg                                                                      |

Several additional **Technology Tours** (within Thermal, Rheology and Microcalorimetry) will take place. The Technology Tours is where TA Application Specialists visit selected users to discuss applications, technical matters, instruments and/or software. Please come back if this sounds interesting and you would like to hear more.

If you find no suitable dates or if you are interested in other topics, then check-out the course overview for other regions.
